PROFILE

Detail-oriented software developer with strong proficiency in Java and Python. Experienced in building efficient, scalable applications and implementing data structures and algorithms. Effective communicator and team player with a passion for learning and staying updated with software development trends.

PROJECTS

Ecommerce Website for Online Book Store (Python Django)

- Designed and developed a fully functional ecommerce platform using Python Django framework.
- Implemented features for user authentication, product catalog management, shopping cart functionality, and secure payment gateways.
- Utilized Django templates, ORM for database management, and integrated third-party APIs for enhanced functionality.
- Employed responsive design principles to ensure compatibility across devices, optimizing user experience and interface accessibility.
-

Salary prediction model using machine learning

- Developed a machine learning model to predict salaries based on job-related factors such as experience, education, location, and industry.
